

CITY OF SANTA PAULA

HARVARD BOULEVARD SEWER PIPELINE, WATER MAINLINE AND PAVEMENT REPLACEMENT PROJECT

The City of Santa Paula's upcoming project on Harvard Blvd. will begin construction soon. This project will take place between 10th Street and Peck Road. This project involves sewer replacement, water main replacement and pavement rehabilitation.

The construction will be performed by Toro Enterprises, Inc. and is anticipated to take approximately a year and a half. It will involve periodic traffic disruptions, heavy equipment, and possible detours.

The City's multi-year infrastructure project will increase the longevity of both the potable water and sewer mainlines as well as improve roadway and sidewalk access along Harvard Blvd.

The City is committed to doing all they can to minimize disruption to residents and businesses during the construction phase.

Please visit the project website for more information and schedule updates:
